

Artist –DAVID J. MEINHARDT

I am a product of 4 generations of artists but because I do not paint or draw I did not consider myself an artist until relatively recently, despite my background in audio/video production and other creative endeavors. I now realize that there are numerous ways to be artistic and express oneself. I am a poet and also pen an occasional tune. My artwork ranges from 3-D, infrared and fine art photography to multi and mixed media installation pieces of various sizes and technologies.

The Rountree Gallery exhibit will feature amazing 3-D “Phantograms” as well as other types of photography and installation art. The subjects of my photos may be serious or nature related, funny or sometimes just strange.

Sometimes I try to make art that facilitates the patron to take a deeper look at social issues and how each one of us uniquely contributes to the world... Sometimes though - an interesting picture is just that- an interesting picture. Here at the gallery, it will be mostly the latter... Maybe.

I wish you the wonder of a child as you explore 3-D photography and beyond. Smile, think, feel, marvel, laugh out loud and be amazed. It’s ok- others are doing the same thing.

David J. Meinhardt
