# Memorandum

**To:** Certified Local Governments in Wisconsin  
**From:** State Historic Preservation Office (SHPO), Certified Local Government Coordinator  
**Date:** July 11, 2022  
**Re:** *National Register of Historic Places* nominations for properties in CLG jurisdictions

---

When the *State Historic Preservation Office* (SHPO) receives a *National Register of Historic Places* (NRHP) nomination for a property within the jurisdiction of a *Certified Local Government* (CLG), the preparer will share the nomination with the chief elected official and the Historic Preservation Commission (HPC) in that community at least 60 days prior to the State Review Board's consideration of the nomination. The State Review Board meets quarterly, typically in February, May, August, and November.

This is an opportunity for the HPC to comment on the nomination and contribute local knowledge of the property and its history.

As a CLG, your commission's responsibility is to review the nomination and provide an opinion as to whether the property meets the eligibility criteria for the NRHP. Typically, HPCs do this by placing the nomination on the agenda of a regular meeting and allocating time for public comment as well as commission review. It is not within the HPC's responsibility or authority to require or request edits from the nomination preparer. If the commission has concerns or feedback about the content of the nomination, that information should be transmitted directly to the SHPO.

A summary of public comments and/or a letter of the commission's opinion may be submitted, by postal mail or email, to:

Ian Gort  
[ian.gort@wisconsinhistory.org](mailto:ian.gort@wisconsinhistory.org)

State Historic Preservation Office  
Wisconsin Historical Society  
816 State St. Rm. 305  
Madison, WI 53706

The letter may come from the chair of the HPC, the director of the Planning Department, the chief elected official, or any combination thereof. Regardless of whether the SHPO receives correspondence from the CLG, the SHPO will proceed with the nomination process.

  3. The compatibility of the general design, arrangement, scale, texture or materials of the construction or alteration, with the historic, aesthetic or architectural values, characteristics and significance of the historic district and/or structure.

4. The relationship of the location of the construction, alteration, or demolition to the streets, public or semipublic ways and any other improvement or property within a historic district.
5. Whether, in the case of a designated historic site or structure within an historic district, the proposed work would detrimentally change, destroy or adversely affect any exterior architectural feature of the improvement upon which such work is to be done.
6. Whether, in the case of the construction of a new improvement upon an historic site, the exterior of such improvement would adversely affect or not harmonize with the external appearance of other neighboring improvements on such site.

  - a. All buildings, structures, and sites are recognized as products of their own time, and alterations have a historical basis.
  - b. Such exterior physical changes as may have taken place in the course of time are evidence of the history and development of a building, structure, or site and its environment. Because these changes may have acquired significance in their own right, this significance should be recognized and respected.
  - c. Distinctive stylistic features or examples of skilled craftsmanship which characterize a building, structure, or site are treated with sensitivity.
  - d. Deteriorated architectural features are repaired rather than replaced, wherever possible. In the event replacement is necessary, the new material need not be identical to but should match the material being replaced in composition, design, color, texture and other visual qualities.
  - e. The surface cleaning of structures is undertaken with the gentlest means possible. Abrasive cleaning and other cleaning methods that will damage the historic building materials should not be undertaken.

- f. Every reasonable effort will be made to protect and preserve archaeological resources affected by, or adjacent to, any project.
- g. Contemporary design for alterations and additions to existing properties is undertaken in such a manner that it does not destroy significant historical, architectural or cultural materials, and such design is compatible with the size, scale, color, material and character of the property or district as outlined:
  - i. Height. The height of the proposed structure or additions or alterations should be compatible with surrounding structures.
  - ii. Proportions of structure's front façade. The proportions and relationships between the width and height of the proposed structure should be compatible with nearby structures.
  - iii. Proportions of openings into facility. The proportions and relationships between doors and windows should be compatible with existing structures.

  - vii. Scale of structure. The scale of the structure should be compatible with surrounding structures.
  - viii. Directional expression of front elevation. Street façades should blend with other structures with regard to directional expression. When adjacent structures have a dominant horizontal or vertical expression (cornices, transom details), this should be carried over and reflected.
  - ix. Architectural details. Architectural details and materials should be incorporated as necessary to relate the new with the old and to preserve and enhance the inherent characteristics of that area.

h. Wherever possible, new additions or alterations to structures should be done in such manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the structure would not be impaired.
